ABSTRACT

A masking tape formed from (a) a heat-resistant adhesive tape having a paper backing and pressure-sensitive adhesive composition, (b) a masking material laminated in an edge region of the pressure-sensitive adhesive composition, having good adhesion to paint and made of a woven fabric, a nonwoven fabric or a sheet capable of adhering to paint, and (c) a masking sheet which covers the masking material and is laminated on the same edge region of the pressure-sensitive adhesive composition. The masking tape can be used to mask a part, for example, an automobile part, during a surface treatment, for example, painting, of the part.
